Outcome

There is a need for studies comparing the effectiveness, safety and tolerability of biological therapies in the long-term and in daily clinical practice. Our In- and Out-patient Pharmacy Databases enable us to create a complete overview of the use of biologicals and biosimilars.

Events

PHARMO and X-IS have joined forces and launched X-IS Rx

PHARMO and X-IS have joined forces and developed a tool for hospital directors, managers and healthcare providers which in combination with DICA registries, creates more insight in the use and outcomes of new, expensive medications.

Publications

PHARMO's first scientific annual report is available

Our first scientific annual report was created to inform our healthcare providers and partners about the research that is done with their data. Without these data the PHARMO Institute would not be able to perform research and contribute to better healthcare for patients.
