Visit our new website!

We are very pleased to announce the launch of our new website. With the new lay out you can find the information you are looking for at first glance. We also updated the content to represent the enhanced capabilities of the PHARMO Institute. Check out the new website: www.pharmo.nl.

Events

Webinar treatment analysis

In March, Edith Heintjes, Research Manager at the PHARMO Institute, gave a webinar on sequential treatment analysis. The presentation on “**Challenges of sequential treatment analysis**” focused on the methodological challenges of patient-centric treatment pattern analysis. It was part of a webinar organised by PHUSE to promote its new Real World Evidence (RWE) stream.

PHARMO in the news

Last week the PHARMO Institute was in the news about our participation in a monitor of the effect of switching from Thyrox Duotab to other brands of levothyroxine after Thyrox Duotab users were forced to switch treatment due to a stock-out in the Netherlands. The PHARMO team also contributed to recently published studies on oral contraceptive use in Europe, impaired renal function, healthcare utilisation in rheumatoid arthritis, survival among oesophageal cancer patients, prescribing patterns of antipsychotic drugs.
