PHARMO

An experienced sparring partner for all your EU healthcare questions

Patient-centric data derived from real-life healthcare settings is a key element in generating evidence for decision-making by healthcare stakeholders. Our clients use this evidence to demonstrate safety, effectiveness and quality of care. PHARMO is specialised in generating this evidence, by means of observational and real-life research with data from current treatment practice. We provide expert data analysis to support regulatory, market access and treatment decisions throughout a product life-cycle.

PHARMO has delivered its tailor-made services for more than 600 late-phase studies across a wide range of therapeutic areas.

For healthcare research using medical data from diabetes patients, PHARMO has access to an excellent observational framework by linking data from different healthcare settings in the Netherlands, including data from general practitioners, in- and out-patient pharmacies, clinical laboratories and hospitals.

We are continuing to expand our capabilities in Europe by collaborating with European healthcare database partners

Examples of information available

Diabetes Cohort

From 2002 onwards

Regularly updated and expanded to include new patients

Diagnoses and symptoms (International Classification of Primary Care (ICPC) codes)

- *Type 1 Diabetes*
- *Type 2 Diabetes*
- *Gestational diabetes*

Test results

- *Body Mass Index (BMI)*
- *Blood pressure*
- *Glycemic control (HbA1c)*
- *Lipids (e.g. LDL, HDL)*

Health indicators

- *Smoking*
- *Physical fitness*

Healthcare resource information

PHARMO Database Network
Rapid access to primary and secondary healthcare data

Innovation by Observation

What can we do for you?

Observational research

- Drug utilisation
 - *Anti-diabetic drug treatment patterns (oral, insulin)*
 - *Adherence / Persistence*
 - *Detailed brand information*
 - *Cardiovascular co-medication*
- Patient characteristics
 - *Age, gender, SES*
 - *BMI / Blood pressure*
 - *Smoking status*
- Drug effectiveness
 - *Glycemic control (HbA1c)*
- Safety outcomes
 - *Cardiovascular outcomes (e.g. ischemic heart disease, stroke)*
 - *Microvascular complications (e.g. diabetic foot, renal failure, retinopathy)*
- Healthcare resource utilisation
 - *Medication use*
 - *Visits to GP*
 - *Hospitalisations*

Additional patient-centric data collection

- *Patient reported outcomes (PRO)*
- *Physician reported outcomes*
- *Patient monitoring*
- *Disease management support*

Expert consultancy

- *Risk management*
- *Market access*
- *Clinical trial design*

We create tailor-made cohorts and we can collect additional patient-centric data if this suits your needs.
