

## Oral presentation

- Myocarditis and pericarditis associated with sars-cov-2 vaccines in four European countries using large electronic health care data sources: a population based descriptive cohort and a nested self-controlled risk interval study ([Link](#))

## Spotlight poster

- Cohort monitoring of 29 Adverse Events of Special Interest prior to and after COVID-19 vaccination in four large European data sources ([Link](#))

## Posters

- VAC4EU active safety surveillance study of the BNT162b2 COVID-19 vaccine in five European countries: study design and first results ([Link](#))
- Comparing diabetes care outcomes of the centrally organized Hoorn diabetes care system with regular care by general practitioners in the Netherlands ([Link](#))
- Identification of frail older adults using routine primary care data: accuracy of four electronically derived algorithms ([Link](#))
- Cardiovascular and renal complications among patients with chronic kidney disease (CKD) in the Netherlands ([Link](#))
- Type 2 diabetes, the epidemic: trends in prevalence, treatment and risk-factor control, 2004-2020 ([Link](#))
- Extracting pregnancies from heterogeneous data sources in Europe: a novel algorithm in the ConcePTION project ([Link](#))
- Representativeness of the PHARMO Electronic Health Records (EHRs) from primary care ([Link](#))
- Incidence of Lyme Borreliosis in the Dutch general practice population: a large-scale population-based cohort study across the Netherlands between 2015 and 2019 ([Link](#))
- BRodalumab Assessment of Hazards: A Multinational Safety (BRAHMS) study of a biological anti-psoriasis drug across six European countries ([Link](#))
- Validation of safety outcomes in routinely collected data: lessons learned from a multinational post-approval safety study ([Link](#))
